don't believe it, you'll agree to this amendment. If you do believe it, you will reject this amendment, so that even if a member moves to pull a bill, the committee can still vote to kill it, and the committee's action prevails. That is my point of view. I'm opposed to the amendment.

SENATOR CROSBY: Thank you, Senator Chambers. Senator Will.

SENATOR WILL: Yes. Madam President, members of the body, I didn't have a chance to visit with Senator Chambers about this amendment. I believe he's misunderstanding it. I believe that...Senator Chambers, you may...you may want to take a look at the amendment. I believe you're misunderstanding it. The intent of the amendment is that the committee does have jurisdiction over that...over that particular bill, even after a motion has been filed. The amendment would resolve the issue in favor of committee jurisdiction and not the other way around. So, maybe...you may want to...Senator Chambers, if you want to take the rest of my time and...if you want to take the rest of my time and clarify that to the body, because I think your remarks were incorrect before.

SENATOR CROSBY: You have about a minute and ten seconds.

SENATOR CHAMBERS: Thank you. Madam President, members of the...

SENATOR CROSBY: Four minutes and...

SENATOR CHAMBERS: It won't take me that long. I agree to the amendment as Senator Will has explained it. I had seen an earlier version, as I pointed out when I came in, I didn't see these amendments until this morning, and being tied up on the other one, I hadn't gotten a chance to look at this one. I appreciate the fact that Senator Will corrected me. And what this will show is that when I am...have it pointed out to me that I'm in error, I will make a 180 degree turn because I want to be right. And this morning, my understanding of what is before us was incorrect. Senator Will has corrected my understanding, and I agree to the amendment, and I enthusiastically support it.
